Product features

Comprehensive monitoring and alerts

Our proprietary monitoring platform detects high- risk activity to provide rapid alerts, so you can detect fraud at its earliest sign, enabling quick restoration for minimal damage and stress.

Alerts for emerging threats and scams

We provide real-time, personalized content about heightened security risks. Alerts leverage internal data to inform you about emerging threats, how they may affect users, and what steps you can take to better protect yourself.

High-risk transaction monitoring

We send alerts for non-credit-based activity that could indicate fraud, such as a wire transfer or an electronic document signature that matches your information.

Financial activity monitoring

Alerts triggered from sources such as bank accounts, thresholds, credit and debit cards, 401(k)s, and other investment accounts help you take control of your finances.

Unemployment fraud center with dedicated support

Our unemployment fraud center ensures that victims have the tools and support they need for a quicker and easier resolution of their case, saving time and stress. Our dedicated specialists are available 24/7 to help you unravel unemployment fraud.

Social media monitoring

Add your and your family's social media accounts and get notified of suspicious activity that could indicate hacking or account takeover. You can even add YouTube accounts and we'll monitor comments for cyberbullying, threats, and explicit content.

CYBER PROTECTION

WiFi network scan and alerts

Checks the health of WiFi networks you connect to with your personal mobile device, detecting and alerting you to unsafe networks or active threats that may put your data or device at risk.

Mobile safe browsing and phishing protection

Be alerted to possible phishing attempts while browsing and using email, apps, and even while sending text messages on your personal mobile devices.

Mobile device locator and theft alerts

Track a lost or stolen device, plus remotely activate the camera to take a photo and get information on the last known location of the device in your email. You can also remotely lock your device, sound an alarm (even if the device is on "silent"), post a custom message for the thief, or even erase your data.

Mobile device and app security scan

Helps identify and alert you to potential malware, viruses, spyware, spam, and other digital threats that may be attempting to infiltrate your personal mobile device. You'll also be alerted if your device has been rooted, jailbroken, or if there's an available software or security update.
